DETAILED ACTION

Double Patenting

1. A rejection based on double patenting of the "same invention" type finds its support in the language of 35 U.S.C. 101 which states that "whoever invents or discovers any new and useful process ... may obtain a patent therefor ..." (Emphasis added). Thus, the term "same invention," in this context, means an invention drawn to identical subject matter. See *Miller v. Eagle Mfg. Co.*, 151 U.S. 186 (1894); *In re Ockert*, 245 F.2d 467, 114 USPQ 330 (CCPA 1957); and *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970).

A statutory type (35 U.S.C. 101) double patenting rejection can be overcome by canceling or amending the conflicting claims so they are no longer coextensive in scope. The filing of a terminal disclaimer cannot overcome a double patenting rejection based upon 35 U.S.C. 101.

2. Claims 82-111 are rejected under 35 U.S.C. 101 as claiming the same invention as that of claims 23-24, 26-29, 32-40, 43-47, 50-51, and 54-59 of prior U.S. Patent No. 6,747,959. This is a double patenting rejection.

3. The claims of the patent and of the instant application cover the same subject matter that is disclosed in the specification. The selection of different algorithms is not grounds for a new patent since the algorithms are the same as the unique algorithm in the specification (defined at Fig. 8 and pg. 27-31). The "binary tree" and "contention" algorithms are disclosed as one algorithm, never as two separate algorithms in the specification.
